Art Unit: 3634

Claims 14 –20 have been withdrawn from further consideration as being drawn to a non-elected invention. Applicant has elected to prosecute the invention of claims 1-13 without traverse.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Baker et al. 6,378,966.

Note electronic device 104, frame assembly 102, rails 108, hanger assemblies 112.

The device is slidably received within the rails. Hanger assemblies 112 retract. There is a channel formed within the rails. Two rails are mounted on frame assembly 102. The flat backside of assemblies 112 form a stop portion. The front portion comprises a ramp.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar electronic racks are illustrated by 6,269,959; 6,230,903 and 6,220,456.
